

New Trailers on Your Fleet...

We can supply you with new trailers, built to your exact specification or used trailers at highly competitive prices and manage the whole process for you.

From the initial understanding of your requirements we will draw up the correct specification for your operation and work with the trailer manufacturer to ensure that when your trailer arrives you can be confident it is ready to roll.

We quality check the trailer at every stage of production and we will not let a trailer out of the factory until it has passed our rigorous PDI and safety inspection.

We work with all of the leading trailer manufacturers and having no affiliation to any one, means that we will select the best manufacturer most suited to the type of trailer you require.

... or as good as ...

If your budget doesn't run to the cost of a new trailer, we can source good quality used trailers and project manage any transformation you require prior to the trailer arriving at your operating centre. This includes giving the trailer a full PDI, safety inspection and MOT if required.

Our technical expertise, ensures you purchase the trailer most suitable for your business needs

Direct access to Manufacturers to ensure we can offer the right choice and price for your business.

Direct access to a network of direct buyers ensures we can obtain the best price for your trailer(s)

Easy to deal with and keeping it simple, we work hard to understand your business requirements.
